

FoundationPRO™

Insulated Foundation Finishing System

Neutral, textured finish looks great with any home!

Easy-to-install custom corners formed on site!

FoundationPRO™

Insulated Foundation Finishing System

Unique System Simultaneously Finishes and Insulates Exposed Foundations

Beautiful Finished Appearance

Introducing FoundationPRO™ - the latest innovation from Progressive Foam. This one-piece solution combines the beautiful, durable performance of premium siding with the power of Neopor® foam insulation. Color-matched Top- and Bottom-Channels provide a clean-looking finish and efficient installation. The special locking system ensures seams stay tight in any weather.

Meet Energy Code Requirements

FoundationPRO is available in both R-10 and R7.5. Featuring high-performance Neopor insulation, it fights energy loss on exposed foundations to help you meet energy code requirements and maintain a Continuous Insulation building envelope.

Moisture Management

FoundationPRO insulation offers excellent moisture management and will not absorb water, which allows moisture to escape more easily as compared to some insulation products.

Durable Performance

FoundationPRO is built tough with a premium, thick polymeric shell permanently adhered to the Neopor insulation. This combination provides excellent resistance to impact from rocks, weed trimmers and construction activity. The shell is also fade resistant to maintain its appearance over time. It does not crack or warp, and the seams stay tight in any weather environment.

FoundationPRO™

Insulated Foundation Finishing System

Interior Comfort

Adding insulation to a homes exterior helps Insulation helps provide a more consistent interior environment for added comfort. And it helps make a home quieter - in fact, similar products from Progressive Foam (tested by independent labs to ASTM standards) provide up to 39% reduction of sound transmission vs. cementitious products.

Termite Resistant

FoundationPRO insulation is specially formulated to protect against termites yet is safe to people and pets.

Installation

The FoundationPRO system features just three, easy-to-install components: Insulated Panel, Top Channel and Bottom Channel. It goes up lighting fast with basic tools for a quick and efficient installation that reduces labor costs. The fasteners do not pierce insulation and maintain good Continuous Insulation properties. Unlike many foundation products, you can install FoundationPRO in any weather or temperature. It also is completely compatible with any foundation insulation or waterproofing system.

Corners and seams fit snug and look great. You can easily and quickly customize corners with a simple V-notch cut on the insulation.

Specifications

Premium Siding Shell is .050 thick for added protection

Siding and insulation permanently attached with specially -formulated adhesives

Insulation Options:

- R-10 = 2.207" thick

- R7.5 = 1.625" thick

Finished Size: 48" wide x 12" high

Low moisture absorption <1%

Excellent moisture management in wet conditions. Excellent performance under moisture cycling conditions
